

This all begins for me back in 2009. I have a feeling, however, its roots are centuries old and involve the genealogy of my family and cultural practices that are even older.

But the facts of the day are as follows:

I was targeted by members of my community as someone with whom they could “play a game on”. The objective? Remove me from my mother’s side (where I served as the manager of her care in a fight against the Parkinson’s Disease afflicting her) so they could put in place their own teams of care providers for financial gain.

I was framed for the crime of elder abuse as part of a “set up”. Initially, I believe this was done in hopes of sending me to prison right away. (Where I could be beaten or killed as they saw fit).

This was done with the use of Remote Neural Monitoring, and what’s known as an Electronic Brain Link. These techniques are employed by the NSA as part of their terrorist surveillance network. Their use growing rampant over the past decades as a means of harassing people, not only suspected terrorists. but anyone deemed “undesirable”. Whether it be within a neighborhood, community, or corporate structure. Essentially. They use their equipment to talk to you in a covert way. A person hears a voice (or voices) talking to them, yet no one else around will hear them.

Add chatter nearby

Those engaging the individual utilize an extensive database of information to address the habits, sexual inclinations, religious beliefs, anything that is a topic that might disturb them to the point ***they self-harm or exhibit erratic behavior. The hope being that person will commit suicide, or at the least react violently enough in such a way to warrant the use of deadly force*** by law enforcement personnel responding to the resultant disturbance or altercation.

Talk about voices

Threats by neighbor at duplex on other side of common wall

My expression of need to care for mom

Restraining order by neighbor

My compliance (except for mom's care)

Use of pepper spray

But they compounded matters by falsifying a charge of assault on an EMT. Despite the fact that I was in 4 point restraints, secured in the back of an ambulance for transport to the hospital; (for the effects of the pepper spray used illegally indoors on me while serving said restraining order)

Key points:

*Why wasn't I sent to mental health treatment for my behavior if unstable as contended?

A. I would have had to be treated differently if associated with a psych jacket.

*Who was Arthur Amerian?

*Was my Mom Targeted? The Parkinson's itself? Medical testing without consent?

*Stonebridge's involvement?

2009. Introduction to Targeted Dream Incubation. Promoting of sexual involvement with minors by those at Fresno County Jail in charge of TDI? Later attempts to involve me with drug manufacturing and distribution.

Identity theft?

Money laundering?

Gaming community?

Informed Consent?

Corporate involvement?

Pharmaceutical Industries?

Governmental control?

Tonga & use of international dateline?

Historical Native American treaties (covert)

Gerrymandering.

LDS missions,

Spanish translations of Books of Mormon/King James Bible.

Music Industry. Grateful Dead.

DNA coding? Breeding?
